About Drobots Company

Drobots is a nationwide provider of Drone and Aerial Robotics STEM Summer Camp Programs, serving boys and girls grades 1 through 12. Drobots is an award-winning program based out of Annapolis, MD. We have worked with NASA, Bell Helicopter, 20th Century Fox and hundreds of schools all over the country, serving tens of thousands of students and campers.

We are inviting boys and girls to participate in our free clinics, so we may test some of our new curriculum for the 2018 summer camp season. Enrolled participants will work with our full time instructional team and enjoy two hours of learning and pure fun!
